

2019Q4

> Quarterly Report

Fourth quarter 2019 summary

Highlights

- No serious incidents
- Completed first operated drilling campaign
- Production of 17,020 (22,362) boepd
- Operating income of NOK 564 (181) million
- Profit from operating activities of NOK 55 (51) million
- Net profit / loss (-) before tax was NOK -35 (-190) million
- Cash flow from operations of NOK 238 (220) million
- Completed refinancing of USD 120 million bond as OKEA03 replaced OKEA01

(Amounts in parentheses refer to corresponding period previous year)

Definitions of Alternative Performance Measures refer to the last section of the Quarterly Report

²⁾ Boepd is defined as barrels of oil equivalents per day

³⁾ Production in 2018 for Draugen and Gjøa includes December figures only, Ivar Aasen is full year

^{*} Restated

Financial review

Statement of Comprehensive Income

(Amounts in parentheses refer to corresponding period previous year)

Total operating income in the fourth quarter was NOK 564 (181) million. The increase from previous year was caused by the acquisition of the interests in the Draugen and Gjøa licences in November 2018.

Other operating income / loss (-) amounted to NOK 31 (84) million. In November 2019, NOK 19 million was recognised from the sale of shares in Grevling and Storskrymten licences to Chrysaor.

Production expenses amounted to NOK 205 (90) million, corresponding to NOK 120.7 (125.4) per boe. Net OKEA produced volumes were 17,020 boepd in Q4 2019 compared to 22,362 boepd in Q4 2018.

In Q4 2019, changes in over/underlift positions and production inventory amounted to NOK 42 (130) million. The effect was mainly caused by increased underlift position on Draugen after partner lifting late December. Produced volumes exceeded sold volumes by 3,185 boepd.

Exploration expenses amounted to NOK 152 (37) million in the quarter. This was mainly related to the dry exploration wells Skumnisse in the Draugen licence of NOK 68 million and Kathryn of NOK 29 million on PL910. This was offset by capitalisation of previously expensed cost of the dry well Infill Ø in the Draugen licence in Q3 with an amount of NOK 14 million, as the classification of the well has been changed to development well. In addition, purchase of seismic data of NOK 20 million on PL958 and NOK 11 million in the Grevling area, plus various field evaluation activities on PL974 (Storskrymten) and PL038D (Grevling) with a total of NOK 21 million were expensed in the quarter.

Impairments amounted to NOK 9 (0) million of technical goodwill on Gjøa which was mainly caused by lower gas prices.

Depreciation in the fourth quarter was NOK 163 (82) million. The increase compared to the fourth quarter last year is related to the acquisition of the Draugen and Gjøa assets in November 2018.

General and administrative expenses amounted to NOK 24 (53) million and which represent OKEA's share of costs after allocations to licence activities.

Net financial items amounted to NOK -90 (-241) million. The net cost in Q4 2019 was mainly explained by interest expenses on bond loans and effects of refinancing in December. Completing the refinancing in Q4 was an important milestone to secure long-term financing of OKEA's future development. The interest expense was partly offset by a net exchange rate gain of NOK 33 million driven by a decrease in the NOK/USD rate from 30 September to 31 December 2019 of around 3 per cent.

Profit / loss (-) before income tax amounted to NOK -35 (-190) million in the quarter.

Taxes (-) / tax income for the quarter amounted to NOK 33 (131) million. For 2019 the amount was NOK -491 million, of which NOK -431 million are tax payable. The main reasons for the 2019 effective tax rate of 117% are costs related to impairments and financial items which are tax deductible with 0% and approximately 33%, respectively. This is partly offset by the effect of uplift.

Net profit / loss (-) for the period was NOK -2 (-59) million and earnings per share were NOK -0.02 (-1.08).

Comparison Q4 2019 and Q3 2019

Revenue from oil and gas sales was NOK 534 million in Q4 compared to NOK 612 million in Q3 2019. The reduction was mainly due to an unplanned shutdown at Gjøa in Q4 and continued restrictions in SEGAL, described in detail in the operational section below, contributing lower volumes of gas and natural gas liquids sold.

Production expenses in the fourth quarter 2019 equated to NOK 120.7 per boe while in Q3, production expenses were NOK 79.7 per boe. The increase was mainly caused by higher well maintenance cost and repair of a subsea pump on Draugen in November, in addition to lower production on Gjøa related to various production issues. Please refer to operational section below for details.

In Q4 2019 impairment was NOK 9 million compared to NOK 0 million in Q3 2019. This impairment of technical goodwill on Gjøa was mainly due to reduced gas prices.

Profit / loss (-) before income tax amounted to NOK -35 million in Q4 compared to NOK 1 million in Q3. A lower profit from operating activities in Q4 was partly offset by a net exchange rate gain compared to third quarter. Year to date Q4 2019 profit before tax amounted to NOK 419 million.

Taxes (-) / tax income (+) in Q4 2019 was NOK 33 million compared to NOK -79 million in Q3.

Net profit / loss (-) was NOK -2 million in Q4 compared to NOK -77 million in Q3.

Statement of financial position

(Amounts in parentheses refer to 31 December 2018 - restated as described in note 3)

Goodwill amounted to NOK 1 426 (1 531) million and the reduction was caused by impairment of technical goodwill in Q1, Q2 and Q4 as described in note 9. In December, an agreement was reached with A/S Norske Shell regarding the final completion statement. Refer to note 3 for effects of the final purchase price allocation on restated 2018 figures.

Right-of-use assets amount to NOK 163 million at the end of fourth quarter 2019.

Cash and cash equivalents were NOK 1 663 (395) million. The increase in cash and cash equivalents is mainly due to positive cash flow from operations and proceeds from the share issue, offset by cash spending on investment and financing activities.

Spare parts, equipment and inventory amounted to NOK 142 (316) million. The reduction was mainly caused by realisation of oil inventory at Draugen in 2019 that was acquired and measured at fair market value as part of the Shell transaction in 2018.

Equity amounted to NOK 1 681 (1 456) million at the end of fourth quarter. The increase was mainly caused by the net proceeds after tax from the share issue of NOK 290 million in the second quarter offset by the net loss for 2019 of NOK 71 million.

Provisions for asset retirement obligations amounted to NOK 4 024 (3 859) million. The increase is caused by 2019 accretion and various changes in assumptions in calculation of estimates.

Interest-bearing loans and borrowings were NOK 2 557 (2 529) million. In December, OKEA refinanced the USD 120 million bond OKEA01 maturing in November 2020 and entered a USD 120 million senior secured bond loan OKEA03 maturing in December 2024.

The lease liability effect from IFRS 16 is split into a non-current liability of NOK 118 (0) million and a current liability of NOK 46 (0) million.

Trade and other payables amounted to NOK 1 372 (1 110) million, which mainly consisted of working capital from joint licences, trade creditors and prepayments from customers.

Statement of Cash flows

(All amounts in parentheses refer to corresponding period previous year)

Net cash flows from operating activities were NOK 238 (220) million in Q4 2019. In Q3 2019, the corresponding amount was NOK 723 million. One of the reasons for the reduction from Q3 2019 was the timing of payment from liftings on Draugen, where Q3 had two payments in July and September respectively while Q4 had one lifting and one payment in November. Furthermore, taxes paid in the quarter amounted to NOK 124 million compared to NOK 50 million in Q3. The remaining effect is related to various changes in working capital items.

Net cash flows from investment activities were NOK -244 (-798) million, of which investments in Oil & Gas properties amounted to NOK -269 (-183) million for the quarter, mainly related to the Yme New Development and capitalisation of the well, Infill Ø at Draugen at NOK 54 million. The net cash flow from investment activities in Q4 2018 was significantly impacted by the completion of the acquisition of Draugen and Gjøa, offset by release of restricted cash.

Net cash flow from financing activities amounted to NOK -129 (916) million, of which interest paid in Q4 2019 was NOK -84 million. The amount in Q4 2018 was mainly related to net proceeds from share issues.

Operational review

(All amounts in parentheses refer to previous quarter)

OKEA produced 17,020 (22,362) boepd in the fourth quarter of 2019. The average realised liquid price was USD 61.2 (68.0) per barrel, while gas revenues were recognised at market value of USD 0.13 (0.29) per standard cubic metre (scm). The price fluctuation between quarters is mainly driven by reduced prices for gas in Europe over the last year.

Draugen (Operator, 44.56%)

Q4 production from Draugen was 8,835 boepd net to OKEA compared to 9,648 boepd net in Q3. This represents a decrease of approximately 8 per cent. Regularity in Q4 was 95% compared to 97% in Q3. The lower production this quarter is mainly due to the shut-in of well D2 caused by a failed downhole safety valve, general decline on the field and well intervention on three wells in the period. OKEA is planning for an efficient and safe well intervention campaign at the earliest convenience to secure continued production from well D2.

Drilling of two wells in the Draugen licence was completed in October and November. The Skumnisse appraisal well (6407/9-12) targeted a north-eastern extension of the Draugen field Rogn Formation reservoir. The reservoir encountered was of poor quality, and no traces of hydrocarbons were encountered. The Infill \varnothing observation well (6407/9-11) encountered a remaining 2.5 m oil column in the top of the reservoir, demonstrating efficient sweep in the local area of the field and no need for an extra producer well. Both wells were drilled with a cost-effective, slim design, with the top-hole sections being 'batch-drilled' to reduce costs. The Skumnisse well was drilled in 14 days and the Infill \varnothing well in seven days.

Gjøa (Partner, 12.00%)

Net production to OKEA in Q4 was 7,842 boepd, compared to 8,135 boepd in Q3. Gjøa production regularity was 75% in Q4 compared to 86% in Q3. The main reason for lower production regularity in Q4 was an unplanned shutdown that occurred 13 November, caused by a malfunction of the power turbine. The malfunction ceased all export of oil and gas at Gjøa. The power turbine was replaced, and production and export resumed 30 November.

As disclosed in the Q3 report, OKEA's production from Gjøa was impacted by the restrictions in the SEGAL system. This has also been the case in Q4, but the restrictions ended 23 December. OKEA's strategy of buying additional capacity at fixed prices through Gassco proved to be successful in Q4, and OKEA has been able to lift between 80 and 100% of normal offtake in the period Gjøa produced.

In Q4, the semisubmersible drilling unit Deepsea Yantai commenced drilling operations on the nearby Duva field and the rig was moved to the P1 location late December according to plan to drill the P1 appraisal well in the Gjøa license. The P1 appraisal well was spudded early January 2020. Deepsea Yantai proved very good performance while drilling in the Duva reservoir.

Ivar Aasen (Partner, 0.554%)

Net production to OKEA in Q4 was 343 boepd, compared to 342 boepd in Q3. Production regularity on Ivar Aasen was 96% in Q4, up from 92% in Q3. The increase in production is mainly due to higher production regularity.

Drilling of D-15 Skagerak was completed in Q3, put in production early October and is producing steadily. Planning of 2020 IOR wells is ongoing.

Development projects

Grevling / Storskrymten (Operator, 35.00% / 60.00%)

Subsurface work and concept studies for the Grevling and Storskrymten licences have been matured to a concept level. The studies will be further matured towards concept selection, considering a newbuild of jack-up Mobile Offshore Production Unit (MOPU) and a FPSO redevelopment.

Yme (Partner, 15.00%)

The Yme New Development project is progressing with the upgrade of the jack-up rig Maersk Inspirer at Aker Solutions Yard in Egersund. Both lifetime extension scope and field specific scope is being executed at the yard. Despite somewhat slower progress than expected for the upgrade of the rig, the target for production start is summer 2020.

The Yme Wellhead Module was installed offshore in September 2019. An additional rig campaign, using Valaris JU-290, is ongoing to execute hook-up scope and carry-over work for the wellhead module. The rig campaign has had good progress and will enable reduced hook-up scope for the Maersk Inspirer when it arrives offshore.

The Submerged Loading System was successfully installed in October 2019 and the Yme wells will be ready for production after pulling of plugs.

Yme will at plateau add a production of 5,700 boepd net to OKEA.

Exploration licences

As described above, the OKEA-operated 'Skumnisse' appraisal well (6407/9-12) was drilled to target a north-eastern extension of the Draugen field Rogn Formation reservoir (within PL093 D). The reservoir encountered was of poor quality, with no traces of hydrocarbons. Analysis of data gathered from the well will be used to interpret the well results and to guide further exploration activities in the area around the Draugen field.

The licensees of the PL973 exploration licence (Chrysaor operator, OKEA 30%), south of the Grevling discovery, committed to drilling two wildcat exploration wells in the licence, with a third (appraisal) well conditional on the results of the first well. The well campaign is planned for Q3-Q4 2020 and has the potential to prove up oil volumes which can be tied in to a Grevling development in the future.

Fast-track data from the PGS 3D seismic survey covering the PL958 licence, north-east of Draugen, was received at the end of the quarter and interpretation work will now be initiated. The fully processed data set is expected to be delivered in the middle of 2020.

The technical evaluation of the Mistral prospects in PL1003 (OKEA operator 60%) was completed with the intention to take a drilling decision before the work program deadline in March 2020.

The 'Kathryn' exploration well in PL910, east of Yme (Repsol operator, OKEA 16.667%), was completed in October as a dry well, as no traces of hydrocarbons were encountered despite the presence of reservoir formation. Further prospectivity in the licence will be evaluated.

In January 2020, OKEA was awarded five new licences on the Norwegian Continental Shelf by the Ministry of Petroleum and Energy under the Award in Pre-Defined Areas (APA) for 2019, strengthening the company's position around the important Draugen and Grevling production and development hubs in the Norwegian Sea and North Sea, respectively.

Health, safety and the environment (HSE)

There were no serious incidents during the fourth quarter, fully in line with OKEA's prioritised objective of securing an incident free environment. OKEA has during the fourth quarter performed drilling operations in the Draugen licence, as well as production activities at the Draugen platform. The drilling operations were OKEA's first drilling campaign as an operator. The campaign was planned and executed in a safe and efficient manner.

OKEA's environmental strategy and energy management system was developed in the quarter. The environmental strategy and energy management system is applicable to all of OKEA's activities, including the operations in the Draugen licence.

OKEA has in the fourth quarter also developed and approved a comprehensive QHSE activity plan for 2020. Among other, the QHSE activity plan contains several actions which addresses the Petroleum Safety Authority's main theme for 2020; "Never another major accident".

Outlook

OKEA has during 2019 established a solid platform as operator on the Norwegian Continental Shelf. OKEA targets further growth through value enhancing mergers and acquisitions on the Norwegian Continental Shelf with portfolios suitable for enabling synergies. OKEA has the capacity and desire for more operatorships, both for producing assets and developments assets up to 100 mmboe. Through the Draugen transition project in 2018, OKEA has established a proven industry leading onboarding process of new assets.

Draugen

Draugen will continue to be the backbone in OKEA's portfolio. OKEA has, together with the Draugen licence partners, moved away from harvest mode and to development mode. A new long-term plan for the licence is in place, covering several key projects which aim to extend the lifetime for the field, such as the development of the tie-in discovery, Hasselmus, expected in 2022.

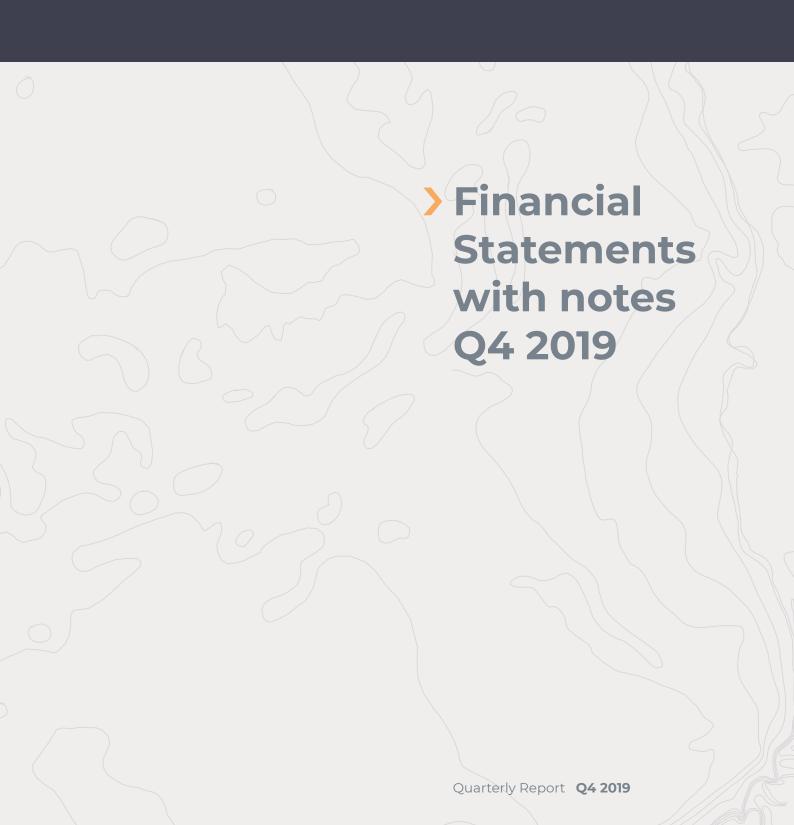

Gjøa

The P1 project progress according to plan. First oil is scheduled for Q1 2021.

Yme

The Yme New Development project is based on OKEA's initiative and idea and getting Yme in production will be a major milestone for OKEA. Yme will at plateau add a production of 5,700 boepd net to OKEA. Scheduled production start is summer 2020.

Statement of Comprehensive Income

01.01-31.12.

Notes to the interim financial statements

Note 1 General and corporate information

These financial statements are the unaudited interim condensed financial statements of OKEA ASA for the fourth quarter of 2019. OKEA ASA ("OKEA" or "the Company") is a public limited liability company incorporated and domiciled in Norway, with its main office located in Trondheim. OKEA ASA's shares were listed on the Oslo Stock Exchange on 18 June 2019. The Company's ticker is OKEA.

The Company's overall vision is to be the leading company on the Norwegian Continental Shelf in terms of delivering safe and costeffective field developments and operational excellence, while maintaining a competent organisation with direct management engagement in all projects and activities.

Note 2 Basis of preparation

The interim accounts have been prepared in accordance with IAS 34 Interim Financial Reporting. The interim accounts do not include all the information required in the annual accounts and should therefore be read in conjunction with the annual accounts for 2018. The annual accounts for 2018 were prepared in accordance with EU's approved International Financial Reporting Standards (IFRS).

The interim financial statements were approved for issue by the company's Board of Directors on 12 February 2020.

Note 3 Accounting policies and restatements of 2018

The accounting policies adopted in the preparation of the interim accounts are consistent with those followed in the preparation of the annual accounts for 2018, except for the implementation of IFRS 16 and change in accounting principle for over-/underlift described below.

IFRS 16

As described in the company's annual financial statements for 2018, IFRS 16 Leases entered into force from 1 January 2019. The implementation resulted in almost all leases being recognised on the balance sheet, as the distinction between operating and finance leases is removed. Under the new standard, an asset (the right to use the leased item) and a financial liability to pay rentals are recognised. The only exceptions are short-term and low-value leases.

The Company adopted the standard using the modified retrospective approach. The implementation had no impact on net equity and resulted in an increase of NOK 198.4 million in property, plant and equipment with a corresponding increase in liabilities, of which NOK 152.9 million is classified as non-current liabilities and NOK 45.5 million is classified as current liabilities.

The Company has applied a gross presentation related to lease contracts entered into as licence operator.

Restatement due to change in accounting principle for valuation and presentation of overlift and underlift

The company has previously used a variant of the sales method where changes in overlift and underlift balances have been valued at its net realisable value and the change in over/underlift has been included as "other income". Due to development in IFRIC discussions, the Company has decided to change to the traditional sales method from 1 January 2019. This means that changes in over/underlift balances are measured at production cost including depreciation and presented as an adjustment to cost. The table below shows the effects of the restatement due to change in the accounting principle for the YTD 2018 figures, with all these effects impacting the Q4 2018 figures.

Restatement due to adjustments of preliminary Purchase Price Allocation on Gjøa affecting prior periods

In second quarter of 2019, the company identified items that required adjustment to the preliminary Purchase Price Allocation (PPA) for the Shell transaction as of 30 November 2018. The estimates for petroleum reserves related to the new P1 project on Gjøa were reduced by the operator prior to the project being sanctioned in February 2019, without corresponding update of the PPA. In addition, there was an error in the calculation of gas processing tariffs. These adjustments were treated as errors and retroactively adjusted in the PPA. These adjustments resulted in a reduction in the net book value allocated to Gjøa of NOK 245.2 million, with a corresponding increase in goodwill of NOK 53.9 million and a decrease in deferred tax liability of NOK 191.2 million compared with the preliminary PPA presented for this transaction in the 2018 annual financial statements.

Restatement due to final Purchase Price Allocation - final completion statement from Shell

OKEA has in December 2019 reached a final agreement with Shell regarding the final completion statement for the Draugen and Gjøa transaction. The effects on the updated PPA is presented below.

The following table shows the abovementioned effects for YTD 2018 figures:

| Amounts in NOK `000 | Audited 2018 | Change in accounting principle 1) | Effect of preliminary updated PPA (Gjøa) Q2 2019 | Effect Final PPA Q4 2019 | Restated 2018 |

¹⁾ Relates to change in principle for valuation and presentation of over/underlift affecting Q4 2018 figures.

Presentation in Statement of Comprehensive Income

In fourth quarter of 2019, the accounting lines "Employee benefit expenses" and "Other operating expenses" are merged and presented in one line as "General and administrative expenses". Previous periods are reclassified to conform presentation to the current quarter's presentation.

Note 4 Critical accounting estimates and judgements

The preparation of the interim accounts entails the use of judgements, estimates and assumptions that affect the application of accounting policies and the amounts recognised as assets and liabilities, income and expenses. The estimates, and associated assumptions, are based on historical experience and other factors that are considered as reasonable under the circumstances. The actual results may deviate from these estimates. The material assessments underlying the application of the company's accounting policies, and the main sources of uncertainty, are the same for the interim accounts as for the annual accounts for 2018.

Note 5 Business segments

The Company's only business segment is development and production of oil and gas on the Norwegian Continental Shelf.

Note 6 Income

Breakdown of petroleum revenues

| | | | 01.01-31.12. | | |
|---------------------------------------|-----------|---------|--------------|---------|--|
| Amounts in NOK `000 | Q4 2019 | Q4 2018 | 2019 | 2018 | |
| | | | | | |
| Sale of liquids | 447 432 | 12 531 | 2 486 165 | 58 550 | |
| Sale of gas | 86 157 | 84 675 | 449 470 | 91 211 | |
| Total petroleum revenues | 533 590 | 97 206 | 2 935 635 | 149 761 | |
| Sale of liquids (boe*) | 917 537 | 79 688 | 5 024 339 | 171 939 | |
| Sale of gas (boe) | 512 879 | 212 396 | 2 086 178 | 232 701 | |
| Total Sale of petroleum in boe | 1 430 416 | 292 084 | 7 110 517 | 404 640 | |
| *Barrels of oil equivalents | | | | | |
| Other operating income | | | | | |
| Yme compensation contract breach* | - | - | 22 098 | 115 000 | |
| Gain / loss (-) from put options, oil | -5 123 | 77 136 | -14 819 | 37 212 | |
| Tariff income Gjøa | 15 953 | - | 56 681 | - | |
| Sale of licenses** | 19 971 | 7 114 | 19 971 | 7 114 | |
| Total other operating income/loss (-) | 30 801 | 84 249 | 83 931 | 159 326 | |

^{*} The compensation recognised in 2019 is based on the final amount received in Q1 2019. For further information refer to the 2018 Annual Report.

^{**} During fourth quarter of 2019 OKEA completed the sale of a 20% interest in PL038D Grevling and a 18.57% interest in PL974 Storskrymten to Chrysaor. Effective date for the transactions were 1 January 2019 and 1 March 2019, respectively.

Note 7 Taxes

Income taxes recognised in the income statement

01.01-31.12.

| Amounts in NOK `000 | Q4 2019 | Q4 2018 | 2019 | 2018 |
|---|----------|----------|----------|----------|
| | | | | |
| Change in deferred taxes current year | 60 208 | -478 763 | -72 117 | -494 048 |
| Taxes payable current year | -38 347 | 638 370 | -430 778 | 638 370 |
| Tax refund current year | - | -28 292 | - | - |
| Tax payable adjustment previous year * | 117 251 | - | 117 251 | - |
| Change in deferred taxes previous year * | -106 476 | - | -106 476 | - |
| Tax refund adjustment previous year | - | 166 | 1 592 | 166 |
| Total taxes (-) / tax income (+) recognised | - | - | - | _ |
| in the income statement | 32 637 | 131 481 | -490 527 | 144 488 |

^{*} The adjustments to current and deferred taxes previous year mainly relate to underlift and physical inventory balances acquired in the Shell transaction in 2018.

Reconciliation of income taxes

01.01-31.12.

| Amounts in NOK `000 | Q4 2019 | Q4 2018 | 2019 | 2018 |
|---|---------|----------|----------|----------|
| Profit / loss (-) before income taxes | -34 929 | -190 234 | 419 396 | -300 202 |

Specification of tax effects on temporary differences, tax losses and uplift carried forward

| Amounts in NOK `000 | 31.12.2019 | 31.12.2018 |
|---|--------------|------------|
| Tangible and intangible non-current assets | -1 945 367 | -1 586 466 |
| Provisions (net ARO), lease liability, pensions and gain/loss account | 1 163 869 | 1 040 741 |
| Interest-bearing loans and borrowings | -14 661 | -39 409 |
| Current items | -47 346 | -116 307 |
| Tax losses carried forward, onshore 22% | 1 190 | - |
| Tax losses carried forward, offshore 22% | - | _ |
| Tax losses carried forward, offshore 56% | - | _ |
| Uplift, offshore 56% | 11 898 | 51 100 |
| Valuation allowance (uncapitalised deferred tax asset) | - | - |
| Total deferred tax assets / liabilities (-) recognised | -830 417 | -650 341 |

Deferred tax is calculated based on tax rates applicable on the balance sheet date. Ordinary income tax is 22%, to which is added a special tax for oil and gas companies at the rate of 56%, giving a total tax rate of 78%.

Companies operating on the Norwegian Continental Shelf under the offshore tax regime can claim the tax value of any unused tax losses or other tax credits related to its offshore activities to be paid in cash (including interest) from the tax authorities when operations cease. Deferred tax assets that are based on offshore tax losses carried forward are therefore normally recognised in full.

There is no time limit on the right to carry tax losses forward in Norway.

Note 8 Tangible assets and right-of-use assets

| Amounts in NOK `000 | Oil and gas properties in production | Oil and gas properties under development | Buildings | Furniture, fixtures and office machines | Right-of-use assets | Total |

Note 9 Impairment

Tangible and intangible assets are tested for impairment whenever impairment indicators are identified and at least on an annual basis. Impairment is recognised when the book value of an asset or cash generating unit exceeds the recoverable amount. The recoverable amount is the higher of the asset's fair value less costs to sell and value in use. The recoverable amount is estimated based on discounted future after tax cash flows. The expected future cash flows are discounted to net present value by applying a discount rate after tax that reflects the weighted average cost of capital (WACC). Technical goodwill arises as an offsetting account to the deferred tax recognised in business combinations and is allocated to each Cash Generating Unit (CGU). When deferred tax from the initial recognition decreases, more goodwill is as such exposed for impairments.

Below is an overview of the key assumptions applied in the impairment test as of 31 December 2019:

| Year | Oil USD/BOE* | Gas GBP/therm* | Currency rates USD/NOK |
|-----------|-----------------|-------------------|---------------------------|
| 2020 | 62.5 | 0.33 | 8.76 |
| 2021 | 57.3 | 0.41 | 8.74 |
| 2022 | 54.5 | 0.42 | 8.72 |
| 2023 | 53.0 | 0.42 | 8.68 |
| From 2024 | 65.0 | 0.47 | 8.00 |

^{*} Prices in real terms

Other assumptions

For oil and gas reserves future cash flows are calculated on the basis of expected production profiles and estimated proven and probable remaining reserves. As the company expects a desicion gate for the Hasselmus project to decide on development concept (DG2) in due time, it has been decided to include a 50% risked profile in the impairment test for Draugen CGU.

Future capex, opex and abandonment cost are calculated based on the expected production profiles and the best estimate of the related cost. For fair value testing the discount rate applied is 10.0% post tax.

The long-term inflation rate is assumed to be 2.0%.

Impairment testing of technical goodwill

Based on impairment test NOK 9 million in impairment charge has been recognised during the fourth quarter.

For the CGU Gjøa the following impairment has been charged in 2019:

| Amounts in NOK `000 | Gjøa |
|------------------------|----------|
| Impairment 04 2010 | 50.040 |
| Impairment Q1 2019 | -53 648 |
| Impairment Q2 2019 | -43 010 |
| Impairment Q3 2019 | - |
| Impairment Q4 2019 | -8 736 |
| Impairment YTD Q4 2019 | -105 394 |

The impairment loss has been recognised to reduce the carrying amount of "technical" goodwill related to the Gjøa acquisition in November 2018. In Q4 the main reason for the impairment on Gjøa was lower gas prices.

Sensitivity analysis

The table below shows what impairment of goodwill would have been in Q4 2019 changing various assumptions, based on all other assumptions remaining constant. The total figures shown are combined impairment for CGUs Gjøa, Draugen, Ivar Aasen and Yme.

Alternative calculations of impairment in Q4 2019 (NOK '000)

| Assumptions | Change | Increase in assumption | Decrease in assumption |
|-----------------------|--------------|------------------------|------------------------|
| Oil and gas price | +/- 10% | - | 235 567 |
| Currency rate USD/NOK | +/- 1.0 NOK | - | 169 961 |
| Discount rate | +/- 1% point | 24 551 | - |
| Inflation rate | +/- 1% point | - | 28 374 |

^{*}Refer to note 20 for more information about derivatives.

Note 11 Other non-current assets

| Amounts in NOK `000 | |
|--|-----------|
| Other non-current assets at 1 January 2018 | - |
| Additions through business combination | 2 745 999 |
| Unwinding of discount | 8 238 |
| Total other non-current assets at 31 December 2018 | 2 754 237 |
| | |
| Other non-current assets at 1 January 2019 (Indemnification asset) | 2 754 237 |
| Changes in estimates | (327 243) |
| Effect of change in the discount rate | 442 651 |
| Unwinding of discount | 98 856 |
| Total other non-current assets at 31 December 2019 | 2 968 502 |

The amount consists of a receivable from seller Shell from the acquisition of Draugen and Gjøa assets in 2018. The parties have agreed that the seller Shell will cover 80% of the actual abandonment expenses for the Draugen and Gjøa fields up to a predefined after-tax cap amount of NOK 638 million (2018 value) subject to Consumer Price Index adjustment. The present value of the expected payments is recognised as a pre-tax receivable on seller.

In addition, the seller has agreed to pay OKEA an amount of NOK 375 million (2018 value) subject to CPI adjustment according to a schedule based on the percentage of completion of the decommissioning of the Draugen and Gjøa fields.

The net present value of the receivable is calculated using a discount rate of 2.6% (2018: 3.6%) and recognised in the financial statements.

Note 12 Share capital

| | | A ordinary | |
|--|-----------------|------------|--------------|
| Number of shares | Ordinary shares | shares | Total shares |
| | | | |
| Outstanding shares at 1.1.2019 | 7 319 389 | 901 061 | 8 220 450 |
| Conversion | 901 061 | -901 061 | - |
| Share split (1:10) | 73 984 050 | | 73 984 050 |
| New shares issued during 2019 | 19 859 550 | - | 19 859 550 |
| Number of outstanding shares at 31 December 2019 | 102 064 050 | - | 102 064 050 |
| | | | |
| Nominal value NOK per share at 31 December 2019 | | | 0,1 |
| Share capital NOK at 31 December 2019 | | | 10 206 405 |

All A ordinary shares were converted to ordinary shares prior to the initial public offering (IPO) and listing on Oslo Stock Exchange in June 2019. The total number of new shares issued was 19,634,550 and consisted of 15,000,000 new shares and 4,634,550 warrants converted to shares in connection with the IPO.

As per 31 December 2019 1,235,000 equity-settled warrants are still outstanding. See note 4 to the 2018 Annual Statements for further description.

Note 13 Trade and other receivables

| Amounts in NOK `000 | 31.12.2019 | 31.12.2018 | |
|---|------------|------------|--|
| Associate receivable and receivables from anaroted lineares | 254 626 | 105.070 | |
| Accounts receivable and receivables from operated licences | 254 626 | 125 072 | |
| Accrued Yme compensation | - | 115 000 | |
| Accrued revenue | 73 211 | 89 960 | |
| Prepayments | 9 883 | 10 127 | |
| Working capital and overcall, joint operations/licences | 17 249 | 156 306 | |
| Escrow receivable, Yme removal | - | 901 | |
| Underlift of petroleum products* | 262 095 | 368 728 | |
| VAT receivable | 4 063 | 16 266 | |
| Fair value put options, oil | 786 | - | |
| Total trade and other receivables | 621 913 | 882 361 | |

^{*} Underlift of petroleum products at 31.12.2018 is high mainly due to Draugen volumes valued at market price (purchase price) in relation to the Shell transaction. The balance at 31.12.2019 consists of Draugen (219), Ivar Aasen (45) and other (-2). At Ivar Aasen there has been no volumes lifted in 2019, and as such building underlift position.

Note 14 Restricted cash, Cash and cash equivalents

Restricted cash:

| Amounts in NOK `000 | 31.12.2019 | 31.12.2018 |
|--|------------|------------|
| | | |
| Bank deposit, restricted, escrow account | - | 48 327 |
| Total restricted cash | - | 48 327 |

The amount in escrow per 31 December 2018 were released in June 2019 as the equity requirements under OKEA01 and OKEA02 bond agreements were fulfilled after the share issue in connection with the Initial Public Offering.

Cash and cash equivalents:

| Amounts in NOK `000 | 31.12.2019 | 31.12.2018 |
|---------------------------------|------------|------------|
| | | _ |
| Bank deposits, unrestricted | 1 647 436 | 388 887 |
| Bank deposit, employee taxes | 16 041 | 5 784 |
| Total cash and cash equivalents | 1 663 478 | 394 670 |

Note 15 Provisions

|--|-----------------------|
| | |
| Provision at 1 January 2018 | 319 668 |
| Additions through business combination | 3 512 231 |
| Changes in Operator's estimate | 9 094 |
| Unwinding of discount | 18 316 |
| Total provisions at 31 December 2018 | 3 859 308 |
| Provision at 1 January 2019 | 3 859 308 |
| Additions and adjustments | - |
| Changes in estimates | (536 803 |
| Effects of change in the discount rate | 586 971 |
| Unwinding of discount | 114 944 |
| Total provisions at 31 December 2019 | 4 024 420 |

Asset retirement obligations

Provisions for asset retirement obligations represent the future expected costs for close-down and removal of oil equipment and production facilities. The provision is based on the Operator's best estimate. The net present value of the estimated obligation is calculated using a discount rate of 2% (2018: 3%). The assumptions are based on the economic environment around the balance sheet date. Actual asset retirement costs will ultimately depend upon future market prices for the necessary works which will reflect market conditions at the relevant time. Furthermore, the timing of the close-down is likely to depend on when the field ceases to produce at economically viable rates. This in turn will depend upon future oil and gas prices, which are inherently uncertain.

For recovery of costs of decommissioning related to assets acquired from Shell, see note 11.

Note 16 Spareparts, equipment and inventory

| Amounts in NOK `000 | 31.12.2019 | 31.12.2018 |

| Capitalised transaction costs OKEA02 | - | - | - | |
| Bond loans at 31 December 2019 | - | 1 540 153 | 1 016 417 | 2 556 570 |

^{*} In December 2019 the Company completed a refinancing of the USD 120 million bond loan OKEA01 maturing in November 2020. The Company has entered into a USD 120 million secured bond loan OKEA03. Maturity date for the entire loan is in December 2024. Interest rate is fixed at 8.75% p.a. with half-yearly interest payment. The issue price for OKEA03 was 99% of the nominal value. OKEA01 was settled at a price of 103% of the nominal value.

During 2019 and at 31 December 2019, the company was in compliance with the covenants under the bond agreements for both OKEA02 and OKEA03. Covenants for OKEA03 are the same as for OKEA02.

Note 19 Leasing

The Company has entered into operating leases for office facilities. In addition, the Company has entered into operating leases as an operator of the Draugen field for platform supply vessel and associated Remote Operated Vehicle (ROV) upgrade, together with office and warehouse Draugen.

| Amounts | in | NOK | ` 000 |
|----------------|----|-----|--------------|

| -45 500 |
|---------|
| |
| 9 988 |
| 652 |
| 198 400 |
| |

Break down of lease debt

| Total lease debt | 163 540 |
|-----------------------|---------|
| Long-term | 117 996 |
| Short-term Short-term | 45 544 |

Future minimum lease payments under non-cancellable lease agreements

| Amounts in NOK `000 | 31.12.2019 |
|---------------------|------------|
| | |
| Within 1 year | 46 030 |
| 1 to 5 years | 114 527 |
| After 5 years | 78 838 |
| Total | 239 395 |

Future lease payments related to leasing contracts entered into as an operator of the Draugen field are presented gross.

Note 20 Derivatives

| Amounts in NOK `000 | 31.12.2019 | 31.12.2018 |
|---|------------|------------|
| Premium commodity contracts | 4 785 | - |
| Unrealised gain/loss (-) commodity contracts | -4 000 | - |
| Short-term derivatives included in assets | 786 | - |
| Premium currency contracts | - | - |
| Unrealised gain/loss (-) currency contracts | - | -15 564 |
| Short-term derivatives included in assets/liabilities (-) | _ | -15 564 |

Note 21 Fair value of financial instruments

It is assessed that the carrying amounts of financial assets and liabilities, except for interest-bearing loans and borrowings, is approximately equal to its fair values. For interest-bearing loans and borrowings, the fair value is estimated to be NOK 2 672 548 thousand at 31 December 2019. The OKEA02 bond loan is listed on the Oslo Stock Exchange and the fair value is based on quoted market prices (level 1 in the fair value hierarchy according to IFRS 13). The OKEA03 bond loan is not yet listed on the Oslo Stock Exchange and the fair value is based on the issue price of 99% from December 2019.

Fair values of put options oil are based on quoted market prices at the balance sheet date (level 2 in the fair value hierarchy). The fair values of the put options are equal to their carrying amounts.

Note 22 Events after the balance sheet date

In January 2020 OKEA was awarded five new licenses in the 2019 Awards in Predefined Areas (APA). Two of the awarded areas are new licences where OKEA will be a partner, the three others are areal extensions of existing licences, two of them operated by OKEA.

There are no other subsequent events with significant accounting impacts that have occurred between the end of the reporting period and the date of this report.
