

# **OKEA ASA Q3 quarterly report** 2023

# Third quarter 2023 summary

## Highlights

- No serious actual incidents at operated assets
- Production of 23,710 (22,263) boepd
- Operating income of NOK 2,105 (1,707) million
- EBITDA of NOK 1,336 (1,167) million
- Impairment of NOK 475 (300) million on the Yme asset mainly due to revision of reserves
- Profit before tax of NOK 460 (391) million
- Net profit after tax of NOK 32 (69) million
- Cash dividend of NOK 1.00 (1.00) per share distributed, in total NOK 104 (104) million
- Production from Hasselmus gas discovery commenced on 1 October 2023
- Successful refinancing extends bond maturity and secures additional liquidity source of USD 25 million

#### (Amounts in parentheses refer to previous quarter)

## Message from CEO, Svein J. Liknes

Production in the third quarter is up by 6.5% largely due to solid performance at our operated assets, Draugen and Brage, including volumes from new wells put onstream.

We continue to add organic growth volumes from infill drilling and projects. The Hasselmus gas discovery started production on 1 October and adds 4,400 boepd in gross production at plateau and is an enabler for restarting export of associated gas and NGL from Draugen. As OKEA's first development project as operator, Hasselmus was completed ahead of schedule and on budget. The Talisker East well which commenced production in May continues to produce well and Brage is currently producing the same volumes as ten years ago.

Following disappointing observations from the new wells in production at Yme, reserve estimates for the field were further reduced this quarter. The value effect of the reduced reserves was somewhat offset by improved forward prices for oil and reduces net profit after tax by NOK 104 million in the quarter. We are currently focused on engaging with the license partners to further explore the results of the analysis and undertake a revised assessment of the Yme field.

Closing of the Statfjord transaction is progressing according to plan towards completion on 30 November. The transaction significantly enhances the company's production and reserves and fits very well into the company's inorganic growth strategy.

We also completed a successful refinancing in the quarter which extended maturity of the outstanding bond debt. We also added a new liquidity source through a USD 25 million revolving credit facility which improves the financial flexibility going forward at relatively low cost.

In the face of ongoing geopolitical instability and continued economic uncertainty, we maintain our belief that the market fundamentals in our industry will continue to be strong and we remain committed to our growth strategy.

Svein J. Liknes, Chief Executive Officer

# Financial and operational summary

	Unit	Q3 2023	Q2 2023	Q3 2022	Full year 2022 <sup>4)</sup>
Total operating income	MNOK	2,105	1,707	2,143	6,653
EBITDA <sup>1)</sup>	MNOK	1,336	1,167	1,636	4,758
EBITDAX <sup>1)</sup>	MNOK	1,370	1,291	1,654	5,085
Profit/loss (-) before income tax	MNOK	460	391	738	3,215
Net profit / loss (-)	MNOK	32	69	104	670
Net cash flow from operations	MNOK	748	1,401	1,183	3,344
Net cash flow used in investments	MNOK	-534	-535	-116	-2,434
Net cash flow used in financing activities	MNOK	-187	-192	-1,248	-1,969
Net interest-bearing debt (IBD) <sup>1)</sup>	MNOK	-535	-511	-799	583
Net IBD ex. other int. bearing liabilities <sup>1)</sup>	MNOK	-1,046	-1,042	-1,371	75
Net production	Boepd <sup>2)</sup>	23,710	22,263	16,064	16,736
Third-party volumes available for sale <sup>3)</sup>	Boepd <sup>2)</sup>	210	332	431	596
Over/underlift/inventory adjustments	Boepd <sup>2)</sup>	2,769	187	769	-1,080
Net sold volume	Boepd <sup>2)</sup>	26,689	22,782	17,264	16,252
Production expense per boe <sup>1)</sup>	NOK/boe	195.1	223.0	253.1	236.8
Realised liquids price	USD/boe	89.0	70.1	106.6	98,4
Realised gas price	USD/boe	61.9	81.2	194.8	138.5

1) Definitions of alternative performance measures are available on page 36 of this report

2) Boepd is defined as barrels of oil equivalents per day

3) Sold volumes include net compensation volumes received from Duva and Nova (tie-in to Gjøa)

4) In 2022, activities from assets acquired from Wintershall Dea were included in the statement of comprehensive income and key figures for November and December only; volumes (boepd) were divided by 365 days in the year

# **Financial review**

## Statement of comprehensive income

Total operating income in the third quarter was NOK 2,105 (1,707) million, whereof NOK 2,131 (1,641) million related to petroleum revenue. The increase in operating income compared to previous quarter relates to an increase in volumes sold, as well as higher realised crude price. The average realised crude price for the quarter was USD 89.4 (76.4) per boe. The NGL discount amounted to USD 0.4 (6.3) per boe which resulted in an average realised liquids price of USD 89.0 (70.1) per boe. Average realised price for gas was USD 61.9 (81.2) per boe, of which USD 0.7 (23.3) per boe was attributable to realised gain on fixed price contracts.

Other operating income/loss (-) of NOK -26 (66) million consisted of a change in fair value of the contingent consideration to Wintershall Dea of NOK -39 (18) million following an increase (decrease) in oil forward prices, and a net hedging loss mainly resulting from financial hedging arrangements for oil of NOK -26 (gain of 5) million. These effects were partly offset by tariff income at Gjøa of NOK 26 (35) million, and income from joint utilisation of logistic resources of NOK 9 (8) million.

Production expenses amounted to NOK 465 (495) million, corresponding to NOK 195 (223) per boe. The lower production expense per boe was due to an increase in produced volumes combined with lower expenses following completion of the turnaround at Draugen in the previous quarter.

Changes in over-/underlift positions and production inventory amounted to an expense of NOK 224 (income of 126) million, as sold volumes exceeded produced volumes by 2,769 (187) boepd.

Net sold volumes from third-party compensation received from Duva and Nova (tie-ins to Gjøa) amounted to 210 (332) boepd.

Exploration and evaluation expenses amounted to NOK 34 (124) million. Area fees and various field evaluation activities amounted to NOK 21 (23) million and work on maturing the Brasse discovery amounted to NOK 13 (21) million. Seismic purchases of NOK 80 million was included in exploration expense in the previous quarter.

An impairment charge of NOK 475 (300) million was recognised on the Yme asset in the quarter. The impairment was mainly driven by a downward revision of reserves, partially offset by increased forward prices for oil. The related tax income amounted to NOK 370 (234) million, resulting in a net after tax impact of NOK 104 (66) million. Impairment in the previous quarter was mainly due to adverse developments in expected realised prices. As Yme is carried at fair value, any adjustments to asset performance and/or macro assumptions will result in impairments or reversal of previous impairments also going forward.

General and administrative expenses amounted to NOK 46 (47) million and represent OKEA's share of costs after allocation to licence activities.

Net financial items amounted to an income of NOK 24 (expense of -115) million. Interest income amounted to NOK 29 (22) million. Net expensed interest and fees amounted to NOK -14 (-18) million. Net foreign exchange gain/loss (-) amounted to NOK 49 (-110) million following a strengthened (weakened) NOK compared to USD and GBP in the quarter. The foreign exchange gain (loss) was mainly attributable to FX-derivative contracts. In relation to the refinancing executed in the quarter, a call premium of NOK 28 (0) million were expensed. For further details on financial items, reference is made to note 14 and 22.

Profit / loss (-) before tax amounted to NOK 460 (391) million.

Tax expenses (-) / tax income (+) amounted to NOK -428 (-322) million and represents an effective tax rate of 93% (82%). The deviation from the expected 78% was mainly due to the change in fair value of the contingent consideration to Wintershall Dea not being tax-deductible. In addition, net financial result and onshore items are deductible at a lower tax rate. These effects were partly offset by the tax effect of uplift.

Net profit / loss (-) for the quarter was NOK 32 (69) million. Earnings per share amounted to NOK 0.31 (0.66).

## Statement of financial position

Goodwill amounted to NOK 1,292 (1,292) million consisting of NOK 1,129 (1,129) million in technical goodwill and NOK 163 (163) million in ordinary goodwill. Reference is made to note 27 for further information.

Oil and gas properties amounted to NOK 6,001 (6,416) million. The decrease mainly related to impairment of the Yme asset of NOK 475 (300) million and depreciation of producing assets of NOK 414 (351) million. The increase in depreciation mainly relates to the increase in produced volumes. These effects were partly offset by investments of NOK 543 (525) million mainly relating to the Hasselmus development, Draugen power from shore, Draugen modifications and Brage production well drilling.

Right-of-use assets amounted to NOK 208 (216) million and mainly related to logistical resources on operated assets and lease of offices. The decrease was due to IFRS 16 depreciation.

Non-current asset retirement reimbursement rights amounted to NOK 3,339 (3,405) million and related to Shell's and Wintershall Dea's obligations to cover decommissioning costs for Draugen/Gjøa and Brage respectively. The decrease was mainly due to an increase in the discount rate applied for estimating the net present value of OKEA's receivables following an increase in long-term market interest rates.

Trade and other receivables amounted to NOK 1,689 (1,362) million and comprise accrued revenue, working capital from joint venture licences and underlift of petroleum products. The increase from previous quarter is mainly due to the oil lifting at Draugen taking place late in September and has been paid in the fourth quarter.

Cash and cash equivalents amounted to NOK 2,346 (2,335) million.

Spare parts, equipment and inventory amounted to NOK 604 (714) million, whereof NOK 295 (424) million related to oil inventory at Draugen, Brage and Yme. The decrease was a result of timing of liftings resulting in fluctuations in oil inventory between quarters. In particular, oil was lifted from Draugen late in the quarter.

Equity amounted to NOK 2,094 (2,165) million, corresponding to an equity ratio of 13% (13%). The decrease was due to the dividend payment of NOK 104 million exceeding net profit after tax of NOK 32 million.

Non-current provision for asset retirement obligations amounted to NOK 5,484 (5,613) million. The decrease was due to an increase in the discount rate applied for estimating the net present value following an increase in long-term market interest rates. The obligations are partly offset by the asset retirement reimbursement rights outlined above.

Interest-bearing bond loans amounted to NOK 1,300 (1,293) million and comprise the OKEA04 (OKEA03) bond loan.

Total other interest-bearing liabilities amounted to NOK 511 (531) million, whereof the non-current portion was NOK 459 (479) million and the current portion was NOK 51 (51) million. The amount represents OKEA's share of the net present value of the future obligations under the bareboat charter agreement for Yme on the Inspirer rig. Reference is made to note 23 for further details.

The lease liability relating to IFRS 16 consist of a non-current liability of NOK 187 (196) million and a current liability of NOK 50 (50) million and represents the liability of the right-of-use assets as described above.

Trade and other payables amounted to NOK 1,777 (1,960) million and mainly comprise payments received under payment quantity agreements, accrued expenses, and working capital from joint venture licences.

Income tax payable was NOK 1,748 (1,238) million which mainly relates to accrued tax payable for the first three quarters of 2023.

## Refinancing

A successful refinancing was completed in the quarter. A USD 125 million senior secured bond (OKEA04) was issued in September at a fixed coupon of 9.125% and maturity in September 2026. The OKEA03 bond with original issue amount of USD 120 million at a fixed coupon of 8.75% and maturity in December 2024 was called in full at a premium of 3.2%. Investor interest in OKEA04 issue was solid, and the bond was oversubscribed more than two times at final pricing.

As part of the refinancing, a super senior revolving credit facility (RCF) of USD 25 million was established, which provides an additional liquidity source for the company at relatively low cost. As per balance sheet date, no drawdowns were made under the RCF.

# Statement of cash flows

Net cash flows from operating activities amounted to NOK 748 (1,401) million and accounted for taxes paid of NOK 276 (333) million which is the first (last) instalment of tax payable for 2023 (2022). The lower net cash flows from operating activities were mainly due to the Draugen cargo being lifted late in the quarter with payment received in the fourth quarter. In the previous quarter payment from two liftings from Draugen were received.

Net cash flows used in investment activities amounted to NOK -534 (-535) million. Investments in the quarter included oil and gas properties of NOK -507 (-505) million, mainly relating to the Hasselmus gas development, Draugen power from shore, Draugen modifications and production well drilling at Brage. In addition, exploration and evaluation expenses of NOK -21 (-5) million mainly related to an exploration well at Brage.

Net cash flows used in financing activities amounted to NOK -187 (-192) million and mainly related to dividend payments of NOK -104 (-104) million and interest payments of NOK -42 (-68) million. Net cash flows from the refinancing amounted to NOK -20 (0) million.

## Financial risk management

OKEA uses derivative financial instruments and forward sales to manage exposures to fluctuations in commodity prices and foreign exchange rates. In the quarter, net realised hedging losses amounted to NOK - 7 (121) million, comprising of gain on forward sale of gas recognised as operating income of NOK 4 (137) million and a net realised loss on financial hedging positions of NOK -11 (-16) million.

As per balance sheet date, ~20% of the estimated net after tax exposure for natural gas for the fourth quarter of 2023 were sold forward at an average price of 124 GBp/th, ~15% for the first quarter of 2024 were sold forward at an average price of 123 GBp/th, and ~15% for the second and third quarter of 2024 were sold forward at an average price 125 GBp/th.

In addition, financial hedging agreements for ~45% of the estimated net after tax exposure for oil for the fourth quarter of 2023 were entered into in the form of collars with price floors around 72-75 USD/bbl and ceilings around 81-105 USD/bbl. ~80% of these calls have a strike above 90 USD/bbl. In addition, ~20% of the estimated net after tax exposure for oil for the first quarter of 2024 was in part hedged by use of collars with price floors of 72 USD/bbl and ceilings of 105 USD/bbl and in part by puts with strike price at 72 USD/bbl.

OKEA has also entered into forward sales of foreign exchange (GBP/NOK) with delivery in connection with the closing of the Statfjord transaction in the fourth quarter of 2023.

Oil options and FX derivatives are recognised at market value at balance sheet date. The unrealised gain from financial hedging for the quarter was NOK 35 (loss of -58) million.

# **Operational review**

OKEA's net production in the quarter was 23,710 (22,263) boepd. Production at Draugen, Gjøa, Ivar Aasen and Nova were according to plan. The Talisker East well at Brage continues to perform well and Brage has sustained production above plan. Technical issues at Yme resulted in reduced production in July.

	Unit	Q3 2023	Q2 2023	Q3 2022 <sup>4)</sup>	Full year 2022 <sup>4)</sup>
Draugen – production reliability <sup>1)</sup>	%	88	94	94	96
Draugen – production availability <sup>2)</sup>	%	80	60	89	94
Brage – production reliability	%	98	94	N/A	N/A
Brage – production availability	%	96	90	N/A	N/A
Gjøa – production reliability	%	96	99	100	90
Gjøa – production availability	%	91	97	98	92
Yme – production reliability	%	80	90	N/A	28
Yme – production availability	%	73	84	N/A	21
Ivar Aasen – production availability	%	96	94	98	82
Nova – production availability	%	96	96	N/A	81
Draugen – production	Boepd	5,830	4,793	6,338	6,767
Brage – Production	Boepd	5,697	3,456	N/A	383
Gjøa – production	Boepd	5,126	6,240	7,353	6,932
Yme – production	Boepd	2,494	2,854	1,354	1,429
Ivar Aasen – production	Boepd	2,838	3,218	1,019	1,086
Nova – production	Boepd	1,725	1,702	N/A	139
Total net production	Boepd	23,710	22,263	16,064	16,736
Draugen – sold volume	Boepd	6,916	6,789	6,923	6,740
Brage – sold volume	Boepd	6,752	605	N/A	27
Gjøa – sold volume	Boepd	4,146	7,881	7,647	7,381
Yme – sold volume	Boepd	2,182	2,542	1,452	1,157
Ivar Aasen – sold volume	Boepd	4,211	4,632	811	351
Nova – sold volume	Boepd	2,272	0	N/A	0
Third-party volumes available for sale <sup>3)</sup>	Boepd	210	332	431	596
Total net sold volume	Boepd	26,689	22,782	17,264	16,252
Total over/underlift/inventory adj.	Boepd	2,769	187	769	-1,080

<sup>1)</sup> **Production reliability** = Actual production / (Actual production + Unscheduled deferment)

<sup>2)</sup> **Production availability** = Actual production / (Actual production + Scheduled deferment + Unscheduled deferment)

**Deferment** is the reduction in production caused by a reduction in available production capacity due to an activity, an unscheduled event, poor equipment performance or sub-optimum settings

<sup>3)</sup> Net compensation volumes from Duva and Nova received and sold (tie-in to Gjøa)

<sup>4)</sup> In 2022, activities from assets acquired from Wintershall Dea were included in the statement of comprehensive income and key figures for November and December only; volumes (boepd) were divided by 365 days in the year

# Draugen (operator, 44.56%)

Net production to OKEA from Draugen was 5,830 (4,793) boepd in the quarter. Production availability was 80% (60%) and production reliability was 88% (94%).

The increase in availability and produced volumes was mainly due to the maintenance shutdown for Draugen executed in the second quarter. A planned shut-in of subsea wells to instal new subsea pumps was completed in 13 days in July.

Production from the Hasselmus gas discovery commenced on 1 October 2023. As a subsea tie-back to the Draugen platform, Hasselmus is expected to add gross production of 4,400 boepd at plateau and a total of 1.65 GSm3 of natural gas. Hasselmus is also enabling restart export of associated gas and NGL from Draugen. First gas was achieved three months ahead of schedule and on budget.

The drilling campaign of the two observation wells in Springmus East and Garn West South was completed in July from the Transocean Endurance rig. The well in Springmus East proved an 8 meter hydrocarbon column present in the structure and Garn West South proved an 11.5 meter hydrocarbon column. Post well evaluations are currently ongoing to assess the potential.

Topside modifications and early scope installation work for the power from shore project is ongoing.

# Brage (operator, 35.2%)

Net production to OKEA from Brage was 5,697 (3,456) boepd in the quarter. Production availability was 96% (90%) and production reliability was 98% (94%). The increase in production was largely due to continued strong performance from the Talisker East well which came on production in May. In addition, a successful well intervention contributed to increased well production potential which increased production at Brage to 6,000 boepd net OKEA by the end of the quarter.

A Sognefjord gas producer commenced production during the quarter. However, Gassco (operator of Gassled) has temporarily reduced the gas export infrastructure capacity to 0.8 MSm<sup>3</sup>/day due to technical challenges in the gas pipeline system. Brage is therefore experiencing reduced gas export capacity and Gassco and OKEA are jointly working to remove this constraint as soon as possible. As the Talisker East well continues to deliver gas production up towards the currently available export capacity, the Sognefjord gas well has been temporarily shut in. Brage overall delivers production volume as planned and the Sognefjord well will be put on production again once the gas export infrastructure capacity is resolved.

Drilling of the Fensfjord south well was completed during the quarter and start of production is expected in the fourth quarter of 2023. The Cook production well is also expected to come on-stream in the fourth quarter of 2023.

A Talisker East water injector and a second producer in Talisker South-East were sanctioned in October with drilling scheduled to commence in the fourth quarter of 2023.

The Sognefjord East project was launched to mature the Kim discovery with the first appraisal well targeted for 2024 from the Brage platform. The gross in-place volume for the area discovered is estimated to 6-12 mmboe.

Work on maturing a potential tie-back of Brasse to Brage is proceeding according to plan towards investment decision in early 2024.

# Gjøa (partner, 12%)

Net production to OKEA from Gjøa was 5,126 (6,240) boepd in the quarter. Production reliability was 96% (99%). The reduced production was mainly a result of five days scheduled maintenance shutdown in August and unplanned deferment due to limited capacity in the Segal system caused by the shutdown at St Fergus gas terminal as well as natural decline. Net delivered and sold compensation volumes from Duva and Nova amounted to 210 (332) boepd in the quarter.

Further maturation of potential development scenarios of the Hamlet discovery is ongoing. Other IOR (Increased Oil Recovery) targets are under evaluation utilising new reprocessed seismic data. Evaluations to identify potential synergies with other potential developments to further reduce costs is ongoing.

Options to appraise the Aurora discovery and drill the Selene prospect in PL195 west of Gjøa are still under review.

# Yme (partner, 15%)

Net production to OKEA from Yme was 2,494 (2,854) boepd in the quarter. Production reliability and availability were impacted by equipment failure in July. Average production reliability was 80% (90%) and production availability was 73% (84%) for the quarter.

Two producer wells were drilled and came on stream during the quarter. Based on the data from the new wells in production OKEA has made a decline assessment of the field. The preliminary results indicate a reduction in technical reserves net to OKEA from 7.6 Mmbbl to 5.8 Mmbbl. OKEA will engage with the license partners to further explore the results of the analysis and undertake a revised assessment of the Yme field. Expected plateau production has subsequently been reduced to ~3,500 boepd net to OKEA.

A new injector was drilled in the beginning of October 2023 and the last producer is currently scheduled to come on stream in early 2024.

# Ivar Aasen (partner, 9.2385%)

Net production to OKEA from Ivar Aasen was 2,838 (3,218) boepd with a production availability of 96% (94%).

The IOR 2024 campaign has been cancelled prior to approval of concept decision (DG2). Potential for new wells is still considered and preparations for the IOR 2026 campaign have started.

Two of the wells in the previous infill campaign were planned converted to injectors following a short production period with a target to provide pressure support and reduce production decline. Conversion of the D-8 well is expected completed in the fourth quarter of 2023. The D-9 well is still in production.

## Nova (partner, 6%)

Net production to OKEA from Nova was 1,725 (1,702) boepd in the quarter. Production availability was 96% (96%).

A side-track drilling operation to improve location of one of the injector wells was successfully completed in the previous quarter which resulted in improved water injection and increased production. Production at Nova was impacted by the maintenance at Gjøa in the quarter and remains somewhat limited by reduced effectiveness of the water injectors. A rig has been secured to drill a fourth water injector well in the second half of 2024 which will enable the operator to target the best location for Nova's fourth water injector and further improve the water injection at the field.

# Acquisition of 28% working interest in PL037 (Statfjord Area)

On 20 March, OKEA entered into an agreement with Equinor Energy AS to acquire 28% working interest (WI) in PL037 (Statfjord Area) with effective date 1 January 2023.

The acquired portfolio comprises 23.93123% WI in Statfjord Unit, 28% WI in Statfjord Nord, 14% WI in Statfjord Øst Unit and 15.4% WI in Sygna Unit. The transaction has been approved by the authorities and closing is expected to take place on 30 November 2023.

Statfjord represents one of the most prolific areas on the NCS with a strong track record for improved oil recovery. The transaction provides a material increase in production and resources to OKEA and enhances diversification and portfolio robustness.

The acquisition includes an initial fixed consideration of USD 220 million, of which USD 25 million were paid in March. In addition, the agreement contains a contingent consideration structure based on profit sharing on crude oil volumes sold as well as on dry gas volumes sold during the period 2023 – 2025.

Expected additional production to OKEA for 2023 has been narrowed from 11,000 – 13,000 boepd to 11,000 – 12,000 boepd due to reduced production reliability caused by unforeseen events and delay from new wells. This is also expected to impact 2024 production and OKEA has been informed that the operator has provided an updated RNB which for 2024 production volumes indicates a reduction of ~3,000 boepd compared to RNB last year. The operator continues to work on mitigating actions and OKEA will work further with assessing the data and provide an update in relation to the guiding for 2024 to be included in the publication of the fourth quarter financial results.

During the quarter, the operator and partners have sanctioned an energy efficiency project that will reduce annual  $CO_2$  emissions by 95,000 tonnes at Statfjord C. The project will replace two gas turbines with heat recovery to produce electric power. A new steam turbine will produce electricity based on surplus heat from two gas compressors. The water injection pumps will also be electrified. The project will improve energy efficiency and reduce total  $CO_2$  emissions on Statfjord C by 25%.

# **Development projects**

## Draugen – power from shore (operator, 44.56%)

OKEA and Equinor in collaboration with the license partners have established a joint project to electrify the Draugen and Njord A platforms.

OKEA is responsible for developing the power infrastructure from shore to Draugen including modifications on Draugen. Equinor is responsible for the cable from Draugen to Njord including modifications on Njord A. Draugen and Njord will be connected to the power grid at Tensio's transformer station at Straum in Åfjord municipality, where Statnett assesses the connection as operationally sound without a need for reinforcement of the power grid.

The PDO and plan for construction and operation was submitted to the Ministry of Petroleum and Energy in the fourth quarter of 2022. Approval is expected in 2023. Following the Ministry of Petroleum and Energy approval of pre-commitments, the project entered into an EPCIC contract with Aker Solutions and a contract with NKT for engineering, production, installation, and protection of the power cable from shore to Draugen.

The project will result in annual reductions of CO<sub>2</sub> emissions of 200,000 tonnes from Draugen and 130,000 tonnes from Njord. In addition, the project will result in reduce operational cost and extend the economic lifetime of the Draugen field.

Following a factory fire in one of the project's planned equipment suppliers, a recovery plan has been developed and progress is monitored closely to minimize cost and schedule impact. Completion of the project is expected in 2027.

# Brasse (partner, 50%)

In December 2022, OKEA entered into a Sales and Purchase Agreement (SPA) with DNO Norge AS (DNO) for 50% WI in the Brasse licence (PL740) with effective date 1 January 2023. The transaction was at zero cost to OKEA.

OKEA has subsequently entered into an SPA with M Vest Energy AS (M Vest) to sell 4.4424% WI in Brasse with effective date 1 January 2023 to further align ownership in the Brage and Brasse licences. Completion of the transaction with M Vest is expected in the fourth quarter.

To reduce cost and maximise the synergies with Brage, the operatorship of Brasse was transferred from DNO to OKEA on 1 September. Key commercial terms for the tie-in have been agreed with the Brage licence where OKEA also is operator and holds a 35.2% WI.

The target of the new partnership is to undertake a fast-track, low-cost review to assess whether a value accretive development concept can be found for the estimated 30 mmboe recoverable volumes at Brasse. Concept decision (DG2) for Brasse tie-in to Brage was approved in August and a final investment decision is expected in early 2024.

# **Exploration licences**

At the Brage field, the Sognefjord Øst formation was tested and hydrocarbon presence was proven. Post drill evaluations is currently ongoing to assess the potential for development well(s) from Brage. In-place volume for the area discovered is 6-12 mmboe.

OKEA is also participating in the APA 2023 round where awards are expected in January 2024.

# **QHSSE and Environment, Social and Governance**

There were no actual serious HSE incidents and no serious acute discharges or emissions in OKEA's operations in the third quarter.

Safe and secure operations is paramount to OKEA and ensuring that all employees have the necessary competence within regulatory requirements and the corporate QHSSE framework is a priority. Updating internal training programmes are a current focus area, with several mandatory training courses being conducted.

OKEA targets to maintain a clear, credible, and consistent approach to ESG. Preparations for upcoming regulatory changes (CSRD - Corporate Sustainability Reporting Directive) is ongoing, including updating of the company's double materiality analysis.

OKEA continually strives to find opportunities to reduce adverse impacts to the environment of our activities. Several energy and emission reduction initiatives have been implemented in 2023 including modification of the

oil export pump at the Brage platform. This resulted in an estimated 1 MW reduction in energy consumption which corresponds to about 5% of the power consumption at the platform.

# Subsequent events

## Announcement of fourth quarter dividend

On 26 October OKEA announced a dividend payment of NOK 103.9 million (NOK 1 per share) to be paid on or about 15 December.

# Outlook

In the face of ongoing geopolitical instability and continued economic uncertainty, the company's focus remains on delivering on the growth strategy and maintaining stable and secure operations.

In March, OKEA entered into an SPA with Equinor to acquire 28% WI in PL037 (Statfjord Area) with effective date 1 January 2023 which is progressing towards completion on 30 November 2023. The transaction represents a step change in production as well as diversification. Reduced production reliability caused by unforeseen events and delay from new wells have resulted in narrowing the range of expected additional production to OKEA for 2023 from 11,000 – 13,000 boepd to 11,000 – 12,000 boepd. OKEA has also been informed that the operator has provided an updated RNB which for 2024 production volumes indicates a reduction of ~3,000 boepd compared to RNB last year. OKEA will work further with assessing the data and provide an update in relation to the guiding for 2024 to be included in relation to the publication of the fourth quarter financial results. The operator continues to work on mitigating actions.

To manage the increased exposure to commodity prices that follows from the acquisition, a more conservative hedging policy including forward sales of gas and options collars for oil has been implemented.

In addition to pursuing inorganic growth opportunities, OKEA is also working to execute its portfolio of development projects. The Hasselmus gas project started on 1 October, will add 4,400 boepd gross production at plateau and enable restart export of associated gas and NGL from Draugen.

OKEA's production guiding for 2023 has been narrowed from 22,000 - 25,000 boepd to 23,000 - 24,000 boepd. Capex guiding for 2023 has also been narrowed from NOK 1,700 - 2,100 million to NOK 1,950 - 2,100 million. The capex guiding comprises completion of the Hasselmus project, Draugen power from shore, Brage infill drilling and other investments, and does not include capitalised interest or exploration capex. All guiding for 2023 excludes effects of the Statfjord transaction.

Liftings of 78,000 bbl from Yme have already been completed in October. A lifting of 330,000 bbl from Brage is expected at the end of October. In November 615,000 bbl from Draugen and three liftings for a total of 144,000 bbl from Yme are expected. In December one lifting from Yme of 66,000 bbl and one lifting from Brage of 374,000 bbl are expected. Timing of future lifting from Yme may deviate somewhat subject to the nominated allocation between licence partners. All volumes are net to OKEA.

OKEA continues to deliver according to the dividend plan. In each of March, June, and September cash dividends of NOK 103.9 million (NOK 1.00 per share) were distributed to shareholders. On 26 October, OKEA announced a dividend distribution of NOK 1.00 per share to be paid on or about 15 December. The board will revert with the dividend plan for 2024 in relation to the publication of the fourth quarter 2023 financial results.

In September, the company successfully completed a refinancing which extends the maturity of the outstanding bond debt. The company issued a USD 125 million 3-year senior secured bond loan (OKEA04) with fixed interest of 9.125% and called the USD 120 million OKEA03 bond with fixed interest of 8.75% and maturity in December 2024. Demand in the OKEA04 bond issue was solid and more than twice oversubscribed at final pricing. In relation to the refinancing, a revolving credit facility of USD 25 million was secured as an additional liquidity source.

OKEA has a clear ambition to deliver competitive shareholder returns driven by solid growth, value creation and capital discipline and the strategy continues to focus on three growth levers:

• actively pursuing further value creation in current portfolio,

• pursuing mergers and acquisitions to add new legs to the portfolio, and

• considering organic projects either adjacent to existing hubs or pursuing new hubs, dependent on financial headroom and attractive risk-reward.

The outlook remains good and the board considers that the company is well positioned to continue to execute on its growth strategy.

### Notes to the interim financial statements

#### Note 1 General and corporate information

These financial statements are the unaudited interim condensed financial statements of OKEA ASA for the third quarter of 2023. OKEA ASA ("OKEA" or the "company") is a public limited liability company incorporated and domiciled in Norway, with its main office located in Trondheim. The company's shares are listed on the Oslo Stock Exchange under the ticker OKEA.

OKEA is a leading mid to late-life operator on the Norwegian continental shelf (NCS). OKEA finds value where others divest and has an ambitious growth strategy built on accretive M&A activities, value creation and capital discipline.

#### **Note 2 Basis of preparation**

The interim accounts have been prepared in accordance with IAS 34 Interim Financial Reporting. The interim accounts do not include all the information required in the annual accounts and should therefore be read in conjunction with the annual accounts for 2022. The annual accounts for 2022 were prepared in accordance with EU's approved International Financial Reporting Standards (IFRS).

The interim financial statements were authorised for issue by the company's board of directors on 25 October 2023.

#### **Note 3 Accounting policies**

The accounting policies adopted in the preparation of the interim accounts are consistent with those followed in the preparation of the annual accounts for 2022. New standards, amendments and interpretations to existing standards effective from 1 January 2023 did not have any significant impact on the financial statements.

#### Note 4 Critical accounting estimates and judgements

The preparation of the interim accounts entails the use of judgements, estimates and assumptions that affect the application of accounting policies and the amounts recognised as assets and liabilities, income and expenses. The estimates, and associated assumptions, are based on historical experience and other factors that are considered as reasonable under the circumstances. The actual results may deviate from these estimates. The material assessments underlying the application of the company's accounting policies, and the main sources of uncertainty, are the same for the interim accounts as for the annual accounts for 2022.

#### **Note 5 Business segments**

The company's only business segment is development and production of oil and gas on the Norwegian continental shelf.

#### Note 6 Income

#### Note 12 Impairment / reversal of impairment

Tangible and intangible assets are tested for impairment / reversal of impairment whenever indicators are identified and at least on an annual basis. Impairment is recognised when the book value of an asset or cash generating unit exceeds the recoverable amount. The recoverable amount is the higher of the asset's fair value less costs to sell and value in use. The recoverable amount is estimated based on discounted future after tax cash flows. The expected future cash flows are discounted to net present value by applying a discount rate after tax that reflects the weighted average cost of capital (WACC).

Technical goodwill arises as an offsetting account to the deferred tax recognised in business combinations and is allocated to each Cash Generating Unit (CGU). When deferred tax from the initial recognition decreases, more goodwill is as such exposed for impairments.

Fair value assessment of the company's right-of-use (ROU) assets portfolio are included in the impairment test.

Below is an overview of the key assumptions applied in the impairment test as of 30 September 2023:

Year	Oil USD/BOE*	Gas GBP/therm*	Currency rates USD/NOK
2023	91.2	1.08	10.7
2024	84.2	1.21	10.6
2025	77.2	1.13	10.5
2026	72.9	0.85	9.4
From 2027	72.1	0.75	9.0

\* Prices in real terms

#### Other assumptions

For oil and gas reserves future cash flows are calculated on the basis of expected production profiles and estimated proven and probable remaining reserves.

Future capex, opex and abandonment cost are calculated based on the expected production profiles and the best estimate of related cost. For fair value testing the discount rate applied is 10.0% post tax unchanged from the Q2 test.

The long-term inflation rate is assumed to be 2.0%.

The valuation of oil and gas properties and goodwill are inherently uncertain due to the judgemental nature of the underlying estimates. This risk has increased due to the current market conditions with rapid fluctuation in supply and demand of oil and gas causing more volatility in prices.

Total cost for  $CO_2$  comprises Norwegian  $CO_2$  tax and cost of the EU Emission Trading System and is estimated to gradually increase from NOK 1 523 per tonne in 2022 towards a long term price of NOK 2 000 (real 2020) per tonne from 2030 in line with price estimates presented by the Norwegian authorities in late 2021. NOx prices are estimated to increase from approximately NOK 17 per kg in 2022 to a level of approximately 28 NOK per kg from 2030. A future change in how the world will react in light of the goals set in the Paris Agreement could have adverse effects on the value of OKEA's oil and gas assets. Sensitivities on changes to environmental cost is reflected in the table below.

#### Impairment testing of technical goodwill, ordinary goodwill, fixed assets and ROU assets

Based on the company's impairment assessments NOK 475 millinon in impairment of the Yme asset was recognised in the third quarter. The impairment was mainly driven by a downward revision of reserves, partially offset by increased forward prices for oil.

No impairment of technical and ordinary goodwill or ROU assets was required in the three month period ending on 30 September 2023.

#### Sensitivity analysis

The table below shows what the impairment pre-tax would have been in the second quarter under various alternative assumptions, assuming all other assumptions remaining constant. The total figures shown are combined impairment for CGUs Gjøa, Draugen, Ivar Aasen, Yme, Brage and Nova.

		Alternative calcu tax impairmen Q3 2023 (N	t/reversal (-)	Increase / decre tax impai Q3 2023 (N	rment

Effect of change in the discount rate	-329 280
Changes in estimates	29 868
Asset retirement reimbursement right at 1 January 2023 (indemnification asset)	3 662 122

Asset retirement reimbursement right consists of a receivable from the seller Shell from OKEA's acquisition of Draugen and Gjøa assets in 2018, and a receivable from the seller Wintershall Dea from OKEA's acquisition of the Brage asset in 2022.

#### Receivable from the seller Shell from OKEA's acquisition of Draugen and Gjøa assets in 2018:

The parties agreed that the seller Shell will cover 80% of the actual abandonment expenses for the Draugen and Gjøa fields up to a predefined after-tax cap amount of NOK 757 million (2022 value) subject to Consumer Price Index (CPI) adjustment. The present value of the expected payments is recognised as a pre-tax receivable from the seller.

In addition, the seller has agreed to pay OKEA an amount of NOK 441 million (2022 value) subject to a CPI adjustment according to a schedule based on the percentage of completion of the decommissioning of the Draugen and Gjøa fields.

The net present value of the receivable is calculated using a discount rate of 4.9% (year end 2022: 3.9%).

Receivable from the seller Wintershall Dea from OKEA's acquisition of the Brage asset in 2022:

The parties have agreed that Wintershall Dea will retain responsibility for 80% of OKEA's share of total decommissioning costs related to the Brage Unit, limited to an agreed pre-tax cap of NOK 1520.6 million subject to index regulation.

The net present value of the receivable is calculated using a discount rate of 6.4% (year end 2022: 6.4%).

Asset retirement obligations at 30 September 2023	5 554 021

#### Asset retirement obligations

Provisions for asset retirement obligations represent the future expected costs for close-down and removal of oil equipment and production facilities. The provision is based on the company's best estimate. The net present value of the estimated obligation is calculated using a discount rate of 3.9% (year end 2022: 3.1%). The assumptions are based on the economic environment at balance sheet date. Actual asset retirement costs will ultimately depend upon future market prices for the necessary works which will reflect market conditions at the relevant time. Furthermore, the timing of the close-down is likely to depend on when the field ceases to produce at economically viable rates. This in turn will depend upon future oil and gas prices, which are inherently uncertain.

For recovery of costs of decommissioning related to assets acquired from Shell and Wintershall Dea, reference is made to note 15.

\* In September 2023 the company completed a refinancing of the OKEA03 bond loan maturing in December 2024. The company has issued a USD 125 million secured bond loan, OKEA04. Maturity date for OKEA04 is September 2026, and interest rate is fixed at 9.125% p.a. with half-yearly interest payments. OKEA04 was issued at par value USD 125 million. The USD 120 million bond loan OKEA03 was settled in September 2023 by way of voluntary early redemption and was called at a premium of 103.2.

During 2023 the company has been in full compliance with the covenants under the bond agreements.

The OKEA04 covenants comprise of:

(i) Leverage Ratio (Total Debt – Liquid Assets) / 12-mth rolling EBITDA of no more than 1.75x

(ii) Minimum Liquidity of USD 25 million

#### Note 23 Other interest bearing liabilities

In September 2023 the company completed the establishment of a USD 25 million Revolving Credit Facility with a tenor of 2.5 years. The Revolving Credit Facility will be available for working capital purposes and will enhance financial flexibility for the company. At 30 September 2023 there are no draw downs on the facility.

In October 2021 the Yme licence completed acquisition of the Inspirer jack-up rig through a bareboat charter (BBC) agreement with Havila Sirius AS (Havila). The part of the lease payments to Havila corresponding to the purchase price paid by Havila to Maersk is considered as an investment in a rig with a corresponding liability, while the remaining amount of the total payments is treated as interest expenses. This treatment is based on the underlying assessment that the reality of the transaction is that it is an investment in a rig financed with a interest bearing liability, rather than a lease. OKEA's proportionate share of the investment and corresponding liability is USD 55.95 million.

The Yme licence has the right and the obligation to purchase the rig at the end of the lease period for NOK 1. In addition the Yme licence has the unconditional obligation to purchase the rig from Havila in case of any termination event during the lease period. The purchase price will then be the remaining amount paid by Havila to Maersk plus interest and other costs. The Yme licence also has the option to purchase the rig at any time during the lease period for the same price.

The liability carries a implicit interest rate of 5.21% p.a., and will be repaid with the lease payments to Havila with the last lease payment in October 2031. Repsol S.A. (RSA) is the parent company of the Yme licence operator Repsol Norge AS. On behalf of Yme, RSA has issued a parent company guarantee for the future lease payments to Havila.

#### Note 24 Leasing

The company has entered into operating leases for office facilities. In addition, as operator of the Draugen field, the company has on behalf of the licence entered into operating leases for logistic resources such as supply vessel with associated remote operated vehicle (ROV), base and warehouse for spare parts and hence gross basis of these lease debts are recognised.

Break down of lease liability	
Short-term (within 1 year)	49 643
Long-term	187 415
Total lease liability	237 058

#### Undiscounted lease liabilities and maturity of cash outflows:

Amounts in NOK `000	30.09.2023
Within 1 year	50 190
1 to 5 years	155 552
After 5 years	141 424
Total	347 166

Future lease payments related to leasing contracts entered into as an operator of the Draugen field are presented on a gross basis.

#### **Note 25 Commodity contracts**

Amounts in NOK `000	30.09.2023	30.06.2023	31.12.2022	30.09.2022
Premium commodity contracts	-	-	-	-
Accumulated unrealised gain/loss (-) commodity contracts included in other operating income / loss(-)	-14 134	7 562	10 578	-24 510
Short-term derivatives included in assets/liabilities (-)	-14 134	7 562	10 578	-24 510

The company uses derivative financial instruments (put and call options) to manage exposures to fluctuations in commodity prices. Put options are purchased to establish a price floor for a portion of future production of petroleum products. In addition a price ceiling is established by selling call options, which reduces the net premium paid for hedging.

At 30 September 2023 there are no outstanding financial forward contracts gas (without physical delivery of gas). All outstanding contracts at 31 December 2022 expired in Q1 2023.

In addition OKEA has entered into non-financial contracts with physical delivery of gas in 2023-2024 at fixed price. At 30 September 2023 the outstanding contracts are 41 650 000 therms of gas with delivery in Q4 2023 - Q3 2024 at fixed prices in the range of 103 - 144.5 GBp/therm. Revenue from these contracts will be recognised at delivery of the gas.

#### **Note 27 Business combinations**

#### Acquisition of a 35.2% interest in Brage, 6.4615% interest in Ivar Aasen and 6% interest in Nova, completed in Q4 2022

On 1 November 2022 OKEA completed the acquisition of a 35.2% working interest in the Brage field, a 6.4615% working interest in the Ivar Aasen field and a 6% working interest in the Nova field from Wintershall Dea Norge AS.

The purchase price allocation (PPA) presented below is based on a updated completion statement from Q1 2023 compared to the PPA presented in Q4 2022. At this stage, the purchase price allocation is preliminary. As a result, the final PPA and the impact on the financial statements from the transaction may differ. The final PPA will be completed within 12 months of the acquisition at the latest.

	PPA	Changes

\* No changes to the PPA was made in Q2 or Q3 2023.

#### **Note 28 Other provisions**

Amounts in NOK `000	
Provision at 1 January 2023	68 917
Settlements/payments to Wintershall Dea	-21 731
Changes in fair value	36 555
Other provisions at 30 September 2023	83 741
Of this:	
Other provisions, non-current	45 019
Other provisions, current (classified within trade and other payables)	38 722
Other provisions at 30 September 2023	83 741

OKEA shall pay to Wintershall Dea an additional contingent consideration based on an upside sharing arrangement subject to oil price level during the period 2022-2024. The provision for the contingent consideration is measured at fair value with changes in fair value recognised in the income statement. The fair value is estimated using an option pricing methodology, where the expected option payoff is calculated at each future payment date and discounted back to the balance date.

#### Note 29 Fair value of financial instruments

It is assessed that the carrying amounts of financial assets and liabilities, except for interest bearing bond loans, is approximately equal to its fair values.

For interest bearing bond loan OKEA04, the fair value is estimated to be NOK 1,353 million at 30 September 2023. The OKEA04 bond loan is planned to be listed on the Oslo Stock Exchange and the fair value is based on the latest quoted market price (level 2 in the fair value hierarchy according to IFRS 13) as per balance sheet date.

Fair values of put/call options oil, forward contracts foreign exchange and forward contracts CO2 quotas are based on quoted market prices at the balance sheet date (level 2 in the fair value hierarchy). The put/call options oil, the forward contracts foreign exchange and the forward contracts CO2 quotas are carried in the statement of financial position at fair value.

#### Note 30 Events after the balance sheet date

There are no subsequent events with significant impacts that have occured between the end of the reporting period and the date of this report that are not already reflected or discloused in these financial statements.

#### Definitions

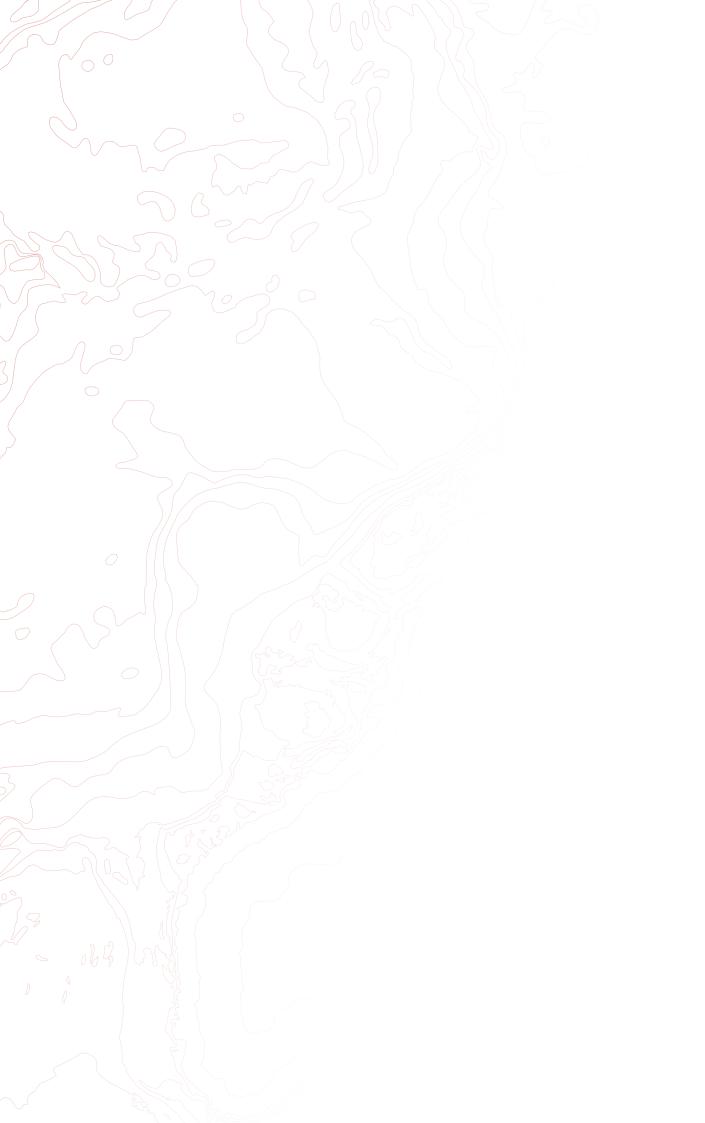

EBITDA is defined as earnings before interest and other financial items, taxes, depreciation, depletion, amortisation and impairments.

EBITDAX is defined as earnings before interest and other financial items, taxes, depreciation, depletion, amortisation, impairments and exploration and evaluation expenses.

Net interest-bearing debt is book value of current and non-current interest-bearing loans, bonds and other interest-bearing liabilities excluding lease liability (IFRS 16) less cash and cash equivalents.

Net interest-bearing debt excl. other interest bearing liabilities is book value of interest-bearing bond loans less cash and cash equivalents.

Production expense per boe is defined as production expense less processing tariff income and joint utilisation of resources income for assets in production divided by produced volumes. Expenses classified as production expenses related to various preparation for operations on assets under development are excluded.
